

Supplier - FUNCTIONAL

V-422*Tackifier for Food Grade Lubricants**Tackifiers*

Typical Properties

| | |
|-------------------------------|----------------------------|
| Specific Gravity | 0.840 |
| Density,lbs/gal | 7.00 |
| Flash Point,°C(°F) | 150 (300) |
| Kinematic Viscosity@100°C,cSt | 2300 - 3800 |
| Appearance | Clear and Colorless Liquid |

Product Description

FUNCTIONAL V-422 is an additive that confers a tack or stringiness to a lubricant. It is used to provide adherence in fluid lubricants and stringiness in greases. **FUNCTIONAL V-422** is approved as a component in FDA/USDA Classification H-1 (21 CFR 178.3570) for lubricants with incidental food contact. For nonfood-grade applications, we recommend **FUNCTIONAL V-178** or, where superior thermal and shear stability are needed, **FUNCTIONAL V-188**.

COMPOSITION:

The active polymeric ingredient in **FUNCTIONAL V-422** is an FDA-approved polyisobutylene. The diluent oil is an FDA-approved white mineral oil.

HANDLING:

Due to the viscosity of **FUNCTIONAL V-422**, elevated temperature (approximately 150°F) can facilitate handling. Temperatures over about 200°F may lead to degradation of tackiness and viscosity. In greases, we recommend adding **FUNCTIONAL V-422** last, to minimize shear degradation during milling. Safe handling precautions are the same as those to be taken with the base oil; see the current Material Safety Data Sheet.

Applications

Fluid Lubricants
Grease

Suggested Treat Rates, %wt

0.5 - 1.5
0.5 - 2.5
