Supplier - SMART OIL
SmartEmul 1618
EO/PO C16C18 Alcohol
Emulsifiers

## **Typical Properties**

Appearance Cloud Point °C pH Value (1% Water Dilution)

Clear Transparent Liquid 60 - 65 5.5 - 7.5

## **Product Description**

**SMARTEMUL 1618** is a nonionic surfactant that is made by reaction from  $C_{16}C_{18}$  Alcohol with ethylene oxide and propylene oxide, which is good for emulsifying different types of base stocks such as naphthenic, paraffinic or esters, PAOs and PAGs.

**SMARTEMUL 1618** exhibits HLB range of 8.0-10.0, that is good for using in formulations of soluble oils, semi-synthetic and fully-synthetic coolants.

**SMARTEMUL 1618** exhibits hard water stability and low foam characteristics that is suitable for machining of alumnum or magnesium alloys even under high pressure cooling.

**SMARTEMUL 1618** has detergency property that can keep the machine tools and lathes clean during machining, which is specially beneficial to the machining cast irons or aluminum alloys.
