### Product Description

**Adtec™ 132** is a simple ester of oleic acid esterified with isopropanol. It is a low-viscosity synthetic ester and offers excellent lubricity, hydrolytic stability with good low temperature fluidity. It is approved for incidental food contact and is biodegradable according to the European 21 days and EPA 28 days biodegradability tests.

#### Applications:

**Adtec™ 132** is very resistant to hydrolysis and often finds use in semi-synthetic and synthetic metalworking fluids as a lubricity additive in applications where the service environment is more severe and demanding. Its good lubricity characteristics enable it to be used as a plasticizer in plastic industry. Its good solvency and low-temperature properties have made it possible as a solvent or process oil for industrial use.
